PSYCHOPATHOLOGY OF THE ADULT - 51723

Last update 21-02-2017

HU Credits: 2

Responsible Department: psychology

Academic year: 0

Semester: 2nd Semester

Teaching Languages: Hebrew

Campus: Mt. Scopus

Course/Module Coordinator: Dr. Eyal Kalanthroff

Coordinator Email: Eyal.Kalanthroff@mail.huji.ac.il

Coordinator Office Hours: On appointment

Teaching Staff:
Dr. Eyal Kalanthroff

Course/Module description:

This course builds on the foundations laid in the "Introduction to Psychopathology"

course during the first semester. It will zoom in on the major psychiatric diagnoses (e.g. substance use disorders, mood and anxiety disorders, eating disorders, and psychotic disorders), presenting their epidemiology, DSM-5 criteria, and the rationale and research evidence underlying changes from the DSM-IV. We will look at case reports and discuss possible diagnoses, and hear from people affected by mental illness about their personal experiences. The process of recovery will be discussed in relation to diagnosis.

Course/Module aims:

To teach adult psychopathology according to the medical model, and provide students with critical tools to reach a DSM-5 diagnosis, after considering alternatives. To supplement the students' practicum experience with theoretical and empirical knowledge, and connect their studies to their clinical work.

Learning outcomes - On successful completion of this module, students should be able to:

- Learning Outcomes □ On successful completion of this course the student will
1. be familiar with the major diagnostic categories of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5)
 2. understand the etiology of the major psychopathologies
 3. be able to diagnose according the DSM-5 categories
 4. be able to discuss the diagnoses and differential diagnoses
 5. know the therapeutic recommendations for central diagnoses
 6. have insight into the process of recovery from mental disorders

Attendance requirements(%):

70

Teaching arrangement and method of instruction: Discussion of readings and case vignettes, frontal lectures by the course instructor, guest lectures, video clips, group presentations by students.

Course/Module Content:

- 23.2.16 The DSM: Blessing or curse?
- 1.3.16 Psychotic disorders
- 8.3.16 Recovery: Is a definition important?
- 15.3.16 Schizophrenia: A personal account
- 22.3.16 Personality disorders
- 29.3.16 Borderline personality disorders: Is recovery possible?
- 5.4.16 Dr Rafi Youngmann (guest lecture): Kernberg and the structural approach to

personality and personality disorders

10.5.16 Eating disorders

17.5.16 Recovery from anorexia nervosa: A personal account

24.5.16 Substance Use Disorders: Symptoms and recovery

31.5.16 Mood disorders

7.6.16 Bipolar disorders

14.6.16 Anxiety disorders

Required Reading:

Required reading will be posted on Moodle, selected from but not limited to the following:

American Psychiatric Association. (2013). *Diagnostic and statistical manual of mental disorders* (5th ed.). Arlington, VA: American Psychiatric Publishing.

Other required reading will be chosen from the list of "Additional Reading Material" below, and posted on Moodle.
