Course/Module description:
Introduction to computational methods for analysis of biological sequences

Course/Module aims:
The structure of guiding principles for developing methods and algorithms to solve problems in computational biology methods.

Learning outcomes - On successful completion of this module, students should be able to:
The student will be able to figure out how to put biological problems mathematically to formulate solutions to those problems and statistical algorithms.

Attendance requirements(%):
100

Teaching arrangement and method of instruction: Frontal Lecture

Course/Module Content:

Required Reading:
Biological Sequence Analysis, by Durbin et al.

Additional Reading Material:
None

Course/Module evaluation:
End of year written/oral examination 30 %
Presentation 0 %
Participation in Tutorials 0 %
Project work 0 %
Assignments 45 %
Reports 0 %
Research project 0 %
Quizzes 0 %
Other 25 %
