Semester: 1st and/or 2nd Semester

Teaching Languages: English

Campus: Mt. Scopus

Course/Module Coordinator: Dr. Amnon Dekel, Sharon Levite-Vaknin

Coordinator Email: intro101@innovate.huji.ac.il

Coordinator Office Hours: Digital Course: Via Email

Teaching Staff:

Dr. Amnon Dekel,
Ms. SHARON LEVITE

Course/Module description:

In an age where technology is creating disruption in the world of work, all university graduates need to prepare themselves. This course will allow participants to learn Innovation and Entrepreneurship fundamentals and how they can help them become more future proof in their careers. The course will focus on how innovation can be developed and enhanced and then will look at the world of entrepreneurship and how it can be relevant for each and every one of the participants. Throughout the course we will introduce and practice the Lean Startup Model, focusing on how to identify real problems for people and then finding solutions for those problems. As an online course, students will watch short videos, use interactive applications, answer online quizzes and develop an idea for a venture (business, social or design). The course will end with a project that presents a model for a real world venture.

Course/Module aims:

- *Expose the students to the fields of innovation and entrepreneurship and strengthen their interest in those fields.*
- *Highlight the relevance and importance of these fields to the students' everyday life and future careers.*
- *Provide the students a macro perspective of the innovation and entrepreneurship fields and the ability to discuss them using professional terms.*
- *Familiarize the students with the process of entrepreneurship.*
- *Introduce the students to the skill set needed for innovation and entrepreneurship processes.*

Learning outcomes - On successful completion of this module, students should be able to:

At the end of the course, students will:

- *Understand basic concepts in the fields of innovation and entrepreneurship.*
- *Learn to identify the market in which a venture operates.*
- *Understand how to identify a problem, its underlying need and how to design potential solutions for it*
- *Understand the lean startup methodology and it can be used to develop a solution in the market.*
- *Understand what a business model is and how to use the business model canvas*

to design the business model of a venture.

- Understand the importance of design within the venture development process.
- Know how to articulate the value proposition of a venture
- Learn how to present a venture successfully and coherently to an audience.

Attendance requirements(%):

Digital Course: no attendance required

Teaching arrangement and method of instruction: The Course will be in English
(With Hebrew and Arabic Subtitles)

- Asynchronous Online
- Assignments
- Quizzes
 - Discussions
 - Final presentation

students must:

- Complete of all the units in the course
- Complete of all the assignments and quizzes
- Participate in Peer assessment
- Participate in the discussion groups throughout the course

Course/Module Content:

The Course will be in English (With Hebrew and Arabic Subtitles)
