Coordinator Email: lachman55@gmail.com

Coordinator Office Hours: By appointment

Teaching Staff:
Dr. Max Lachman
Course/Module description:
In view of numerous reviews in the way mental health services and interventions which are users ("service users") and the limited availability of services and evidence-based interventions, the growing recognition of the importance of developing different practices. A practice that will allow the participation of service users in planning and implementing interventions to promote their integration into the community. So mental health systems around the world have adopted the approach to recovery and planning services in accordance with the principle of "human-centered" (Person-Centered Practice).
The course will focus on: (1) the guiding principles of deliberate practice recovery, (2) the term "person-centered", (3) which recovery plans ("Recovery Plan") and rehabilitation program ("Personal Psychiatric Rehabilitation Plan") and (4 ) Presentation of practices aimed at recovery (services and interventions).
Also emphasis will be placed on reviewing approaches to course organization and coordination of care (Case Management) in mental health in order to create a support system for the person in recovery to be more coordinated and integrated.
The course also will address the connection between deliberate practice rehabilitation and community integration
