Responsible Department: communication & journalism

Academic year: 0

Semester: 1st Semester

Teaching Languages: Hebrew

Campus: Mt. Scopus

Course/Module Coordinator: Dr. Meital Balmas

Coordinator Email: meitalbalmas@gmail.com

Coordinator Office Hours: Tuesday 12:00-13:00

Teaching Staff:

Dr. Meital Balmas

Course/Module description:

Content analysis is one of most used methodologies performed by social scientists in general and by media researchers in particular. This course focuses on the analysis of media content based on quantitative content analysis methodology (computerized and inhuman). Students will explore questions such as why are certain conflicts covered in the news and others not? In what way do media report on certain political parties or leaders? To what extent can we see bias in news coverage? Students will conduct research using both automatic and manual content analysis for their own research. They will formulate a research question, develop a model to answer the research question and transform this question in measurable concepts, analyze the data and present the results in an adequate way.

Course/Module aims:

Every student must read the compulsory material and present their proposal topic to the class

Learning outcomes - On successful completion of this module, students should be able to:

- 1.To learn quantitative content analysis designs and methods.
- 2.To analyze published journal articles and evaluate them.
- 3.To analyze content analysis data by using SPSS.
- 4.To do an original quantitative content analysis study and write a paper that can be sent to an academic conference
