

The Hebrew University of Jerusalem

Syllabus

Participation in Research - 51110

Last update 07-11-2016

HU Credits: 0

Degree/Cycle: 1st degree (Bachelor)

Responsible Department: Psychology

Academic year: 0

Semester: Yearly

Teaching Languages: Hebrew

Campus: Mt. Scopus

Course/Module Coordinator: Dr. Tali Kleiman

Coordinator Email: mstalik@mscc.huji.ac.il

Coordinator Office Hours:

Teaching Staff:

Course/Module description:

First year students are required to participate in 10 hours of experiments. Specifically, one needs to accumulate 40 points of participation credits in experiments. Each point is equivalent to a quarter hour of participation in an experiment. Continuing onto the second year is conditional upon fulfilling this requirement, and therefore, it is important to make sure to complete all of the required participation in experiments before the end of the first year.

It is possible to participate in experiments that are offered through frameworks in other majors (like business or education) up to one hour maximum. That is, 9 out of 10 hours of participation in experiments must be in the framework of experiments that are being conducted in the Department of Psychology.

Students who choose to take the course "Social Processes" during their first year must complete their participation in experiments during the first semester.

Students who are required to participate in experiments in their other major will be required to participate in additional experiments in the framework of the Department of Psychology. In this case, the Department of Psychology requires participation in 8 hours of experiments (in other words, these students should accumulate 32 points of credit in the psychology framework in addition to the points required of them from their second major).

Course/Module aims:

Introduction to research methods in experimental psychology and experience different types of research.

Learning outcomes - On successful completion of this module, students should be able to:

1. To understand the perspective of a participant in a psychological experiment.
2. To describe a variety of research methods in experimental psychology.

Attendance requirements(%):

NA

Teaching arrangement and method of instruction: Participating in experiments.

Course/Module Content:

Participating in a variety of experiments based on the topics investigated in the Department.

Required Reading:

None

Additional Reading Material:

None

Grading Scheme:

Additional information:

A student needs to accumulate 40 points of participation credits in experiments. This requirement is a condition for transition to the 2nd year.
