Course/Module Coordinator: Professor Jonathan Huppert

Coordinator Email: jonathan.huppert@mail.huji.ac.il

Coordinator Office Hours: Thurs 14:00

Teaching Staff:

Prof Jonathan Huppert

Course/Module description:

In this course, students in clinical psychology will conduct a single case study on the treatment of panic disorder. This will be a systematic study, from hypothesis generation, design/measure selection, to treatment and data collection, analysis and write up.

Course/Module aims:

*to provide experience in conducting single case research
to understand the complexities of clinical research
to learn about conceptualizing mechanisms of therapy*

Learning outcomes - On successful completion of this module, students should be able to:

*the student will be able to design a single case study according to hypotheses he generates
the student will understand better mechanisms of treatment in panic disorder*

Attendance requirements(%):

100

Teaching arrangement and method of instruction: small group supervision/meetings

Course/Module Content:

- 1. meetings to learn about conducting single case studies*
- 2. recruitment of patients*
- 3. panic seminar to learn to treat panic*
- 4. assessment of patients*
- 5. treatment/data gathering*
