Course/Module description:

Finnovation is a real-world course focusing on creating successful FinTech startups. The course is structured as an Accelerator for new ventures. Mixed teams of students from business, computer science, and law disciplines will create an innovative financial startups taking it through all steps of development. Each team will include 1-2 students from each discipline. The first 2 months will be devoted to identifying needs for services/instruments in the financial markets. The second part is devoted to market analysis, IP search and developing the basic technology. In the third part, the teams will make presentation of their ideas, prepare a business plan, apply for provisional patent, devise business strategy (including pricing and marketing). Finally, the teams will present their project to potential investors. Professional guest lectures will make presentations on their specific aspects of the financial innovation process

Course/Module aims:

The course provides a unique opportunity to gain real world experience while still in an academic environment.

Learning outcomes - On successful completion of this module, students should be able to:

In this course, students will become familiar with the main systems of financial mediation, regulation and rules for their activities and will also learn about Technological developments useful in these areas. Students will go through a process of testing ideas, matching For regulation, choosing a marketing and business strategy, product development, preparing a marketing plan, protecting rights and preparing Business Plan. The course is an integrative course that requires time, with most of the work being done in teams with the guidance of facilitators and mentors.
