חומר חובה לקריאה:
1) Final paper-Project Concept Note

Two key readings to prepare for your project:

“High Level Mapping to SDGs: Green, Social and Sustainable Bonds,” and Working towards a Harmonized Framework for Impact Reporting, International Capital Market Association, June 2020.

Concept Note for Sustainable Infrastructure, Duke University, Nicholas Institute, July 2020

Requirements:

- Students are requested to choose a topic and submit a one-page outline prior class on (October 13)
- Powerpoint presentations and discussion of each Project Concept Note (done as individual or group no great than 3) will be in a special class review session to be scheduled

- Subject to approval of the topic and the outline, students are required to compose 15-20 pages (double-spaced) and submit the final paper no later than (December 16)

- Late papers will not be accepted.

- The project concept note will be based on diagnostic questions the students wish to pursue focused upon a related to one more specific Sustainable Development Goals related to specific impact measurements. The objective is to develop a feasible and investable development project using the financial toolkit presented in the course work and in research and case studies discussed in the class and potentially eligible to be included in a social, health, or environmental impact bond or a pooled security for sustainability, social and green bonds under the criteria of the International Capital Markets Association (discussed in reading below and included in high-level mapping of such securities for meet SDGs).

These project concept could be considered for possible further work in a class offered in the Spring do prepare the project concept note into a project implementation plan for Fieldwork fellowships applications by eligible students at the Milken Innovation Center in conjunction with the Blum Lab for Developing Economies at the Jerusalem Institute or existing development finance field sites by other partners in the field in Africa, India, or Latin America as part of our ongoing collaboration between: UC-Berkeley and the Jerusalem Institute-Milken Innovation Center/Hebrew University of Jerusalem School of Business Development Finance Practice Program. Students who complete successful field assignments as Fellows will receive a graduate Development Finance Practice certificate from the Hebrew University of Jerusalem School of Business.

- The project concept note will be based on diagnostic questions the students wish to pursue focused upon a related to one more specific Sustainable Development Goals related to specific impact measurements.

- Their project will need to address the following questions:

1. What are the financial bottlenecks for the SDG challenges?
2. Why isn't funding availability? Does the market work?
3. If not, why not?
4. Who could fund and what do they care about?
5. What financial tools can help catalyze that funding through a development capital structure stack or design?

Additional questions that will need to be addressed in each project implementation proposal would also include:

-
- *Project: What is the project proposing to do?*
 - *Opportunity: What need is it meeting? Who is interested in the success of this project? Who are the stakeholders?*
 - *Team: Who is doing it? What is their experience, expertise, roles?*
 - *Market: Who is the customer? What are the marketing channels to reach the customer?*
 - *Costs: How much does it cost to build? To operate?*
 - *Capital Structure: How will it be financed? By whom and under what terms and conditions? What are the returns to each investor?*
 - *Plan: What is the work plan and milestones?*
 - *Risks: What are the risks and how will the risks be mitigated?*
 - *Outcomes: What are the outcomes and how will they be measured?*

Students will need to address these issues in their proposal:

- *Different innovative financing tools and resulting instruments for potential impact investments;*
 - *Methods of risk mitigation;*
- *Different models for structuring impact investment funds, blended finance models and capital structures, and pooled-securities to develop the financing pipeline;*
- *Examine use of catalytic first loss models, grants, loans, equity, etc. that can be mobilize for impact enterprise and project finance addressing development goals.*
- *Creative ways to target small and middle-size enterprises and projects through pooled securities, revolving loan facilities, fintech, and alternative risk assessment and management models.*

2) Completion of case study write-ups and readings presentations for class discussion: You will be asked to review and present case studies and/or readings related to the course from those listed below. Students will be asked to choose their presentation groups by the end of Class Monday , October 31. This summary presentation and related class attendance and engagement in lectures and questions will comprise the second area of course evaluation. (20%) Please note presentation sign-up page on the course website on B-Course.

*COURSE UNIT OVERVIEW**

**Instructor Lecture and Overview (either synchronous or asynchronous) will precede each Guest Lecture or case study presentations as noted below. .*

I. Introduction to Finance Toolkit and Innovative Finance (October 24)

Structural Changes in Capital Markets and Development Finance

- a. Global Trends*
- b. What is Financial Innovation? From Structured to Blended Finance*
- c. Why and How does Capital Structure Matter? (October 24)*

II. Entrepreneurial Finance (October 24)

- a. Lifecycle of Finance*
- b. Business Finance and Capital Structure*
- c. Equity, Debt finance, and Hybrid Debt Instruments*
- d. SME Finance*

III. Project Mechanics Lecture and Workshop on SDGs--Building Solutions Sets into Project Pipeline (October 31)

**Practitioner Guest: Lecturer:*

Steven Zecher, Project Director, Milken Innovation Center-Jerusalem Institute

This week will be devoted to background and development of the Project Development Concept Note for the final work product of the course---linking development finance projects to programs to policies to capital market transactions.

Key background readings for this session are:

***New Perspectives on Results-Based Blended Finance for Cities: Innovative Finance Solutions for Climate-Smart Infrastructure, International Bank for Reconstruction and Development/World Bank 2019.*

***Case Study Arezki, Rabbah, et.al., "From Global Savings Glut to Financing*

-
- Infrastructure," Economic Policy, April 2017: 221-261.*
- **Godnar, Gordon and B. Comer, Project Finance Teaching Note," Wharton School, University of Pennsylvania, 1996.*
- UPDATE: Dovrak, Paul, "Put a fence around It: Project finance explained"*
- **Huxley, Joe, "Value Capture Finance, Making Urban Development Pay Its Way," Urban Land Institute, 2009.*
- ***The ABCs of Asset-Backed Securitization," Guggenheim, 2022*
- **Asset Backed Securitization," Stern School of Business, NYU, 2016.*

IV. IV. Impact Investment and Social Finance: Social Impact Bonds and Beyond (November 7)

**Practitioner Guest Lecture: TBD*

a. Pay for performance contracting

b. Full-spectrum Asset Class Product and Program Development Finance

c. Risk-Return-Impact: Metrics

V. Financing Ideas: Disruptive Science and Tech Finance, Focus on Global Health (November 14)

**Guest Lecture: Prof. Andrew Lo, MIT Financial Engineering Lab
"Research-Based Obligations and Lessons from Hollywood"*

- a. From Venture Capital Models to Research Bond Obligations*
- b. Disruptive Technologies and the Sustainable Development Goals*

VI. Infrastructure (Resilient, Social-Environmental, and Tourism Applications) (November 21)

Practitioner Guest Lecture:

TBD

Reading:

Dan Carol, "The Case for an Infrastructure Pre-Development Fund," Milken Institute (April 2020)

- a. Infrastructure Projects*
- b. Urban Revitalization*

*VII. Environmental Finance (November 28, December 5)
Practitioner Guest Lecture:*

Frederic Samama, Climate Change and Financial Innovation, CIO, Amundi-CPR Asset Management

XI. Development Finance—Blended Finance (Case Study Applications) (December 12)

Practitioner Guest Lecture:

Dr. Christine Negra, VisantVision, “Blended Finance in Sustainable Agriculture”

XII. Development Finance-Energy (Case Study Applications) (December 26)

Practitioner Guest Lecture:

TBD

Special Readings:

"FERC Order 2222 Levels the Playing Field for Distributed Energy Resources," Claire Gotham, Power and Utilities, February 18, 2021

Cara Carmichael, et.al., The Carbon Emissions Impact of Demand Flexibility, New York/Boulder: RMI, February 2021.

Whitney Mann, et.al., Zeroing In: The US Financial Sector Perspective on Net-Zero Lending and Investing, RMI, 2021.

XIII. Development Finance—Food-Water Nexus (Case Study Applications) (December 26, January 2)

Practitioner Guest Lecturers:

Naty Barak, Chief Sustainability Officer, Netafim/Obia, Community Irrigation Model: Case of Karanataka

Special Readings:

“How to Mobilize Private Investment at Scale in Blended Finance”, Convergence and DFID Impact Programme, April 8, 2020

XIV. Development Finance –Global Health (January 9, 16)

TBD

XV. Project Implementation Plan Presentations by Student Teams (January 23)

Course Assignments and Readings

Reference Resource throughout course: Miken Institute 5-Minute Finance
The course presumes some basic knowledge of economics and finance. Please use our 5-Minute Finance app above for review as well as the Glossary and Appendix link supplied as part of the course.

Remedial review and terms (present value, compound interest, understanding capital structure, investment and consumption, Black-Scholes Formula, forward and future contracts, etc.) are easily accessible at Kahn Academic Finance and Capital Markets.

DETAILED READINGS Per Section of Course:

****Required Readings for Lectures**

***For Student Presentations**

I. Introduction to Financial Toolkit and Innovative Finance for Development (October 24)

1. Homi Kharas and Charlotte Rivard, "Financing for sustainable development is clogged," Brookings Blog, May 11, 2022.
2. ****Allen, Franklin and Yago, Glenn.** "Financing the Future: Market-Based Innovations for Growth". Upper Saddle River, New Jersey: Pearson/Wharton School Publishing, 2010:
 - a. Chapter 1: The Evolution of Finance;
 - b. Chapter 2: A Framework for Financial Innovation: Managing Capital Structure.
3. ****Anja-Nadine Koenig, Chirs Club and Andrew Apampa,** Innovative Development Finance Toolbox, KFW, October 2020.
4. "Integrating nature and knowledge into economics," Popular Science Background, Nobel Prize in Economic Sciences, 2018. (Key Reading Background on Endogenous Growth Theory-Romer, et.al.)
5. ****Ross Levine,** "Finance, Growth and Inequality", IMF Working Paper, WP/21/164 (June 2021).
6. Levine Aghion, Peter Howitt, and Ross Levine, "Financial Development and Innovation-Led Growth," in T. Beck and R. Levine, Handbook of Finance and Development, London: Elgar, 2018
7. Mollaahmetoglu, E. and G. Y. Akcali, "The Missing-Link between Financial Development and Economic Growth: Financial Innovation, Procedia Computer Science 158 (2019) 696-704
This important reading contextualizes financial innovation as part of this process.
8. Economic Growth, Technological Change, and Climate Change, Scientific Background Paper, Economic Sciences. Nobel Prize, 2018. (Key background reading

on Nordhaus, Eccles, etc. impact of climate finance and environment, green accounting, etc.).

9. Madsberg, S. and Keohane, G., Rockefeller Foundation (eds.), *The Innovative Finance Revolution, Special Issue of Foreign Affairs*, February 2017.
Framework for SDG Aligned Finance, OECD, 2020

 מצגת / הצגת פוסטר / הרצאה / סמינר / פרוסמינר / הצעת מחקר 20 %
 נוכחות / השתתפות בסיוור 20 %

מידע נוסף / הערות:
REQUIREMENTS:

All readings are required. Together with attendance at the lectures and participation in structured discussions they will provide students with a tool kit to develop a concise proposal focused on financing a targeted development impact (the course's

final project). This end of semester project will be a proposal for the application of an innovative finance product(s) to a project or program that would target a specific sector (agriculture/food, health, energy, or environmental), geography (developing/frontier economy); and/or technology transfer or development application related to the UN's sustainable development goals. This will require a description of the proposed project or program, milestones, project targets, outputs, inputs (including financial, technology and intellectual property inputs), identification and quantification of social, economic and/or environmental outcomes, proposed capital structure, sources and uses of funds and a targeted range of return on investment and social/environmental impact (including identification of potential avoided costs). This would include the identification of specific financial tools (bonds, notes, guarantees and credit enhancement, grants, performance based contracts, revolving loan funds or structured finance product, etc.) and how they might be applied to serve the development target.

Themes for these project proposals would include increasing food and agriculture (agricultural productivity, improve food quality and sustainability), global health (including diagnostics, primary care and community projects, treatment modalities and preventive medicine; bio based and sustainable solutions), energy (low carbon projects and climate change adaptation), and environmental finance (sustainable water, land and forest management, conservation and ecosystem services, biodiversity, drought prevention, carbon projects, etc.). Projects could include:

- SME finance for enterprise development (compare and contrast specific private equity, revolving loan fund models, structured finance solution etc.);*
- Environmental or energy infrastructure (use modern finance mechanisms such as risk pooling and risk transfer to create climate response systems to protect food security, technology transfer for water technology, water quality/recycling, distributed water treatment and production or on-grid, off-grid, or under-grid renewable energy project);*
- • Agricultural or food innovation (plant or soil science technology innovations, post harvest, or supply chain finance models utilizing agricultural pull-mechanisms);*
 - Global health innovation (development impact bond, product development partnership, advanced market commitment applied to a vaccine, treatment modality, or preventive measure).*

These project proposals would address a prospective practical development project and explicate the deployment of a development finance innovation.

The project proposal would address how innovative finance could design a capital structure for a project or development target that mobilizes:

- 1) new pools of private and public revenue streams;*
- 2) new revenues options (e.g., tax, charges, fees, bond sales);*

3) new incentives (frontloading and debt-based instruments, philanthropic/government guarantees, public-private partnerships, insurance, and other market-based mechanisms).

These projects can be completed as individual (or teams of two reflecting the team members' increased level of effort to meet this assignment's objective).

Guidelines and an example of such a project implementation proposal will be discussed in the first class on October 21.

Through the projects, students will demonstrate their ability to:

- Design and construct an innovative finance application (for either a proof of concept or beta site project) in a developing economy;*
- Measure, analyze and report development impacts of an innovative finance project;*
- Identify and develop how a development impact investment would benefit and expand capital access through the creative use of innovative financing tools;*
- Assist a high-impact project to access flexible market and below-market financial tools;*
- Identify how to structure the transaction and identify potential interested partners with aligned interests in the proposed project.*
