
וגישות, לעתים תוך התמקדות במצוקות של הטבע עצמו, על יצוריו הצומחים והחיים.

Coordinator Email: pikiis@huji.ac.il

Coordinator Office Hours: Wednesday 1500-1600

Teaching Staff:

Prof. Piki Ish-Shalom

Course/Module description:

We live in and with nature, we dominate it, and being dominated by it. We exploit natural resources, at times ignoring the problems we produce by exploitation. But nature has its way of showing us its distress: floods, fires, pandemics. Add to that the human organization into states, driven apart from each other due to different sensitivities, priorities, and interests, and we get a plethora of conflicts in and around nature. We will explore these issues, from different perspectives, and emphases.

Course/Module aims:

To identify the different interfaces between nature and conflicts, and the various ways in which these interfaces produce conflicts and/or allows their solutions. We will learn the different perspectives with which we approach we study these issues.

Learning outcomes - On successful completion of this module, students should be able to:

To describe conflicts arising out of the human interface with nature

To explain the processes leading to those conflicts

To discuss modes of behaviors in those conflicts

To judge morally human behavior towards nature

Attendance requirements(%):

80

Teaching arrangement and method of instruction: Discussions in class, guest lecturers and independent research

Course/Module Content:

Concepts

*Climate Crisis and conflicts
- Securitization -*

Borders, nature, and conflicts

Nature, opportunities and environmental diplomacy

Urban nature and conflicts

Environmental justice

Drainage of the Hula

Nature and the Israeli-Palestinian conflict

Animals, security and war

The war on nature
