Introduction to Development - 59531

Last update 16-09-2018

HU Credits: 2

Responsible Department: *Glocal International Development*

Academic year: 0

Semester: 1st Semester

Teaching Languages: English

Campus: Mt. Scopus

Course/Module Coordinator: Reut Barak Weekes

Coordinator Email: reut.barak1@mail.huji.ac.il

Coordinator Office Hours: *mondays 10:00-12:00*

Teaching Staff:
Dr. Reut Barak

Course/Module description:

The course provides students with an introduction to the field of international

development, while focusing on community development and the impact of development interventions on disadvantaged individuals and communities.

Course/Module aims:

Provide students with in depth understanding and knowledge in the main theories which developed in the field of international development since the mid 20th century.

Encourage students to develop critical thinking of the relationship between theory and practice and expand their knowledge on various practices and methods of international development in developing countries in recent years.

Learning outcomes - On successful completion of this module, students should be able to:

- Discuss main theories developed since the mid 20th century in the field of international development
- Analyze the links between historical processes and the development of theories in the field of international development
- Distinguish between various development theories and approaches
- Compare various approaches to the understanding of poverty and development
- Explain the emergence of human and community based approaches to development since the 1980s
- Compare the construction and components of the MDGs and SDGs as the main pillars of global policy making in the field of international development

Attendance requirements(%):

Mandatory

Teaching arrangement and method of instruction: One credit online, on credit classroom workshops

Course/Module Content:

The course discusses the development of development theory since the 20th century; the various world events which led to changes in development theory and were significantly affected by them; and influential approaches to development practice. Historically, the course provides students with a broad understanding of power relations between the developed and the developing worlds since the 15th Century, discusses the links between conflict, governances and development and examines various approaches to governance and their implications on development. Building on the understanding that communities are the key for achieving sustainable positive advancement in human development, the course

focuses on theories and approaches which are relevant to community development, including the Capability Approach and the Assets Based Approach to development.
