Dr. Tal Jonathan-Zamir

Course/Module description:

*This course is about the core theories of criminology, which seek to answer questions such as "Why does one become a criminal?" "Why does one cease to commit crime?" "Why can we find more crime in some societies than in others?"*

Course/Module aims:

*The purpose of this course is to introduce the students to basic criminological theories, which have formed the basis for thinking about and investigating criminal activity and the social reaction to it, and which are still the basis for much of recent research in criminology.*

Learning outcomes - On successful completion of this module, students should be able to:

- For each theory reviewed in this course:*
- Describe the core propositions of the theory.
  - Identify the hidden assumptions of the theory
  - Examine the empirical evidence concerning the theory
  - Evaluate the criticisms of the theory
  - Identify the potential policy implications of the theory

Attendance requirements(%):

*Full attendance (at least 80%)*

*Teaching arrangement and method of instruction: Lectures  
Assignments*

Course/Module Content:

1. Introduction
2. Classic and neo-classical schools of criminology
3. The positive school of criminology
4. Control theories of crime
5. Social disorganization and crime
6. Anomie/strain theories of crime.
7. Differential association and social learning
8. Labeling/social reaction theories of crime
9. summary and integration
