### *Syllabus*

### *Introduction to statistics in criminology - 61797*

*Last update 08-10-2017*

*HU Credits: 6*

*Degree/Cycle: 1st degree (Bachelor)*

*Responsible Department: criminology*

*Academic year: 0*

*Semester: Yearly*

*Teaching Languages: Hebrew*

*Campus: Mt. Scopus*

*Course/Module Coordinator: Dr. Roni Factor*

*Coordinator Email: [rfactor@mail.huji.ac.il](mailto:rfactor@mail.huji.ac.il)*

*Coordinator Office Hours: Please coordinate appointments*

*Teaching Staff:*

---

Dr. Ron Factor  
Mr. Eran Itskovich  
Ms. Shaked kovalsky

Course/Module description:

*An introduction to statistics course for criminology students*

Course/Module aims:

*The purpose of this course is to familiarize students with basic concepts in statistics. The students will learn methods and statistical tests that will enable them to assess studies carried out by others as well as to carry out basic independent research.*

Learning outcomes - On successful completion of this module, students should be able to:

*Evaluate studies that use basic statistical methods; Make a thoughtful use of statistical measures, calculate them and interpret their meaning; Process data using the SPSS and Excel software and interpret their outputs.*

Attendance requirements(%):

*100% - Students are required to attend all lectures and lab sessions*

*Teaching arrangement and method of instruction: Lectures and lab sessions*

Course/Module Content:

- 1. SPSS Programming*
- 2. Levels of measurement*
- 3. Representing and displaying data*
- 4. Measures of central tendency*
- 5. Measures of dispersion*
- 6. Probability*
- 7. The logic of statistical inference*
- 8. Steps in statistical test*
- 9. The normal distribution*
- 10. Z-test*
- 11. Single sample t-test*
- 12. Two sample t-test*
- 13. Confidence intervals*
- 14. Analysis of variance*
- 15. Power analysis*

- 
16. Measures of association
  17. Pearson coefficient
  18. Linear regression
