Course/Module description:

*In this course we shall introduce the method of forcing for constructing models of ZFC. We shall prove that the method does produce models of ZFC. Using it, we shall prove the independence of the Generalized Continuum Hypothesis. Iteration of forcing will be introduced in order to prove the consistency of Martin's axiom.*

Course/Module aims:

Learning outcomes - On successful completion of this module, students should be able to:

*Ability to prove and apply the theorems presented in the course.*

*Ability to apply correctly the mathematical methodology in the context of the course.*

*Acquiring the fundamentals as well as basic familiarity with the field which will assist in the understanding of advanced subjects.*

*Ability to understanding and explain the subjects taught in the course.*
