Course/Module description:

The course is a continuation of the Clinical / Community Year One Qualification course and is aimed at learning the basics of basic clinical skills in patient examination.

Course/Module aims:

Learning the basics of basic clinical skills in patient examination (mainly physical examination) and deepening the medical communication.

Learning outcomes - On successful completion of this module, students should be able to:

- At the end of the student course
1. Demonstrate physical examination of the major systems
 2. Demonstrate an understanding of professionalism in its functioning with patients, colleagues and teachers
 3. Demonstrate proper medical admission

The course will be accompanied and supported by an active course model on the site, where all course materials will be presented.

Attendance requirements(%):

Required

Teaching arrangement and method of instruction: Course Format:

1. 3 sessions during the first semester of the faculty on Wednesdays 8-11 where

small groups and simulation will be practiced

2. 4 sessions during the second semester once a week in the halls, a 3-hour practice in the departments (3 first sessions) and a fourth meeting in groups for mutual examination and examination of selected patients

3. 3 meetings in the year 2004/1 in the first introductory month and at the end of the month OSCE for the course summary.
