Course/Module description:

This course is designed to provide students with fundamental knowledge in dermatology. This program combines frontal lectures, case-based studies, and interactive clinical exposure in both outpatient clinics and inpatient department. The primary goal is to instruct students in the essential skills of conducting anamnesis and physical examinations in dermatology while imparting basic, clinically-relevant knowledge about common skin diseases

Course/Module aims:

- Acquisition of dermatological anamnesis capabilities
- Acquisition of capabilities in dermatological physical examination and description of skin eruptions
- Performance of basic differential diagnosis in skin diseases based on their morphology

Learning outcomes - On successful completion of this module, students should be able to:

Students should be able to:

- Conduct anamnesis in dermatology
- Describe a physical examination in dermatology using morphological terms for describing skin eruptions

Attendance requirements(%):

80%

Teaching arrangement and method of instruction: Teaching arrangement and method of instruction

- Recorded and Face-to-Face Lectures
- Case-Based Practice
- Clinical Exposure in the Outpatient Dermatology Clinics
- Bedside Learning in the Inpatient Dermatology Department

Course/Module Content:

Basic terms in dermatology

Common papulosquamous diseases (Psoriasis, Pityriasis rosea, Pityriasis versicolor)
Eczema/Dermatitis (Atopic dermatitis, Contact dermatitis, Seborrheic dermatitis)
