Course/Module description:

The Course for General Orthopedics for fifth year medical students, is given at the four campuses (Hadassah Ein Kerem, Hadassah Mount Scopus, Kaplan Medical

Center and Shaare Zedek Medical Center)

The duration of the course is three weeks, according to student groups.

Course/Module aims:

Teach basic orthopedic surgery at the level required by every general practitioner and identifying situations where an orthopedic surgeon intervention is needed. In addition, basic experience in surgical skills (sutures, etc.) and orthopedics.

Learning outcomes - On successful completion of this module, students should be able to:

At the end of the course, the students should be able to:

1. Take orthopedic history and perform an orthopedic physical examination.
2. Understand the pathophysiology of the more common orthopedic problems.
3. Basic management of orthopedic patients including diagnostic and therapeutic approaches to musculoskeletal disorders (both conservative and surgical).
4. Identify orthopedic emergencies and optimize treatment accordingly.
5. Understanding the relationship between orthopedic care and other medical fields.
6. Exposure to the orthopedic system, in both the clinical and research aspects.

Attendance requirements(%):

80

Teaching arrangement and method of instruction: lectures, Emergency Room, Clinics, Operating Rooms, Bedside Teaching, PBL Cases for Group Discussions

Course/Module Content:
