Course/Module description:

*Clinical course of removable prosthesis (complete and partial dentures)
Teaching comprised of: Treating edentulous and partially edentulous patients by means of removable prosthesis, lectures, seminars and case presentations.*

Course/Module aims:

Provide the students with a thorough understanding of the edentulous and partially edentulous milieu. Treat fully and partially edentulous patients by means of removable prosthesis. Selected patients will be treated using dental implants

Learning outcomes - On successful completion of this module, students should be able to:

- *Demonstrate understanding of the needs and limitations of the edentulous patient and have a proper attitude toward elderly patients.*
- *Prepare a customized treatment plan.*
- *Execute the clinical treatment phases followed by self- criticism.*
- *Establish a mutual language with the dental technician.*
- *Apply the prosthetic principals, knowledge and skills and execute successfully the proper treatment prescribed. The students should be able to implement the treatment by means of: Complete dentures, over-dentures , immediate dentures, interim partial and full dentures, CrCo partial dentures and implant supported complete and partial dentures.*

Attendance requirements(%):

80%

Teaching arrangement and method of instruction: Clinical practice, lectures, seminars and case presentations.

Course/Module Content:

Clinical treatment:

Each student should treat two patients according to their needs. The treatment can comprise of the following: Complete dentures, over-dentures , immediate dentures, interim partial and full dentures, CrCo partial dentures and implant supported complete and partial dentures.

Topics of lectures and seminars:

- *Characteristics of the elderly patient*
- *Reline and rebase procedures and materials*
- *Phonetics*
- *Use of dental articulators and face-bows in complete dentures*
- *RPD diagnosis and treatment planning*
- *RPD diagnosis and treatment planning in conjunction with crowns*
- *Immediate and interim dentures*
- *Implant supported and tooth supported over-dentures*
- *Implant supported partial dentures*
- *Combination syndrome*
- *New materials and techniques in RPD treatment*

Required Reading:

Boucher's Prosthetic Treatment for Edentulous patients.11th Edition.

McCracken's Removable Partial Prosthodontics.10th Edition.

The pre- clinical and clinical manuals

All the lectures and seminars given in the pre-clinical and clinical courses
