Course/Module description:

*Clinical course of removable prosthesis (complete and partial dentures)
Teaching comprised of: Treating edentulous and partially edentulous patients by means of removable prosthesis, lectures, seminars and case presentations.*

Course/Module aims:

Provide the students with a thorough understanding of the edentulous and partially edentulous milieu. Treat fully and partially edentulous patients by means of removable prosthesis. Selected patients will be treated using dental implants

Learning outcomes - On successful completion of this module, students should be able to:

- *Demonstrate understanding of the needs and limitations of the edentulous patient and have a proper attitude toward elderly patients.*
- *Prepare a customized treatment plan.*
- *Execute the clinical treatment phases followed by self- criticism.*
- *Establish a mutual language with the dental technician.*
- *Apply the prosthetic principals, knowledge and skills and execute successfully the proper treatment prescribed. The students should be able to implement the treatment by means of: Complete dentures, over-dentures , immediate dentures, interim partial and full dentures, CrCo partial dentures and implant supported complete and partial dentures.*

This course supports the following HUHSDM Professional Practice Competencies: 1.1,1.2, 1.3, 2.1, 2.3, 2.8, 2.14, 2.15, 3.1, 3.3, 3.6, 3.9
