Course/Module description:

This course provides each 6th year student with both basic and advanced clinical training and experience in comprehensive treatment. This multidisciplinary prosthodontic treatment experience will include the following disciplines: oral diagnosis, oral and maxillofacial surgery, endodontics, periodontics, orthodontics, hospital dentistry; focused on: operative dentistry, fixed prosthodontics Implantology and digital dentistry. Each 6th year student is assigned to a clinical instructor's group, which is managed by three dentists, at least one of which is a specialist in prosthodontics. These clinical instructors provide training in diagnosis, treatment planning, treatment sequencing and the treatment of assigned patients. Consultations in the various specialties of dentistry is available upon request. The student, supervised by the instructors, direct and coordinate the total dental health care of their patients. Weekly seminars are held within each group to discuss student cases, and to review dental techniques as well as a literature review. Individual student meetings are scheduled to discuss clinical performance.

Course/Module aims:

- * To teach the student to manage and perform multidisciplinary prosthodontic treatment. Implementation and integration of knowledge acquired during his/her studies.
- * Acquire knowledge for diagnosis and treatment tools of adult patients with an indication for teeth supported FPD and implant supported fixed dentures.

-
- * This course aims at preparing the 6th year student to be capable of performing basic and advanced clinical procedures on their assigned patients under the supervision of dental clinicians while consulting specialists in other fields of dentistry.*
 - * To prepare the students for developing clinical competency to a satisfactory level.*
 - * To prepare students to pass internal and external examinations in order to graduate from the School of Dental Medicine.*
 - * To competently serve the needs of patients in private practices and in the community.*

Learning outcomes - On successful completion of this module, students should be able to:

- * Perform a thorough patient anamnesis and clinical examination*
- * Discuss the diagnosis of dental diseases and their etiology*
- * Recommend detailed comprehensive treatment plan*
- * Assemble caries management by risk assessment*
- * Outline clinical and technical stages of fixed partial dentures both tooth and implant supported*
- * Demonstrate clinical skills in the treatment/restoring teeth to form, function, and esthetic standards*
- * Perform basic clinical procedures of fixed partial dentures, tooth and implant supported*

Attendance requirements(%):

90%

Teaching arrangement and method of instruction: Lectures, Seminars & Clinical Practice

The course includes lectures given by members of the department and guests, seminars and clinical presentations.

The theoretical exam at the end of the year will be comprised of open ended questions.

Course/Module Content:

Theoretical aspects of:

- Etiology, prevention, diagnosis and management of dental diseases.*
- Clinical and technical sequences of restorative dentistry.*
- Clinical and technical sequences of fixed partial dentures.*
- Planning and performing implant supported fixed partial denture.*

-
- Esthetic dentistry.

Clinical Requirements:

- 4 comprehensive treatment plans
- 35 restorations
- 6 post & core placement
- 10 units of tooth supported fixed partial dentures
- 2 units of implant supported fixed partial dentures

Required Reading:

1. Shillingburg, Hobo, *Fundamentals of fixed prosthodontics*. Whitsett. Quintessence Books, 1981
2. Misch CE. *Dental Implant Prosthetics*. Elsevier Mosby 2005
3. Kraus B., Jordan R.E. and Abrams L. *The dentition: Its alignment and articulation from: Dental anatomy and occlusion*. The Williams & Wilkins Co. 1980
4. Mohl, Zarb, Carlsson and Rough: *A textbook of Occlusion*. The temporomandibular joint. Quintessence Books 1988. pp. 81-96.
5. Goldman HM, Cohen DW. *Periodontal Therapy*. CV Mosby Co. Chapter 30: Occlusal adjustment
6. Schuyler C.H The function and importance of incisal guidance JPD 13:1011-1029 1963
7. Donovan ,Chee A review of contemporary impression materials and techniques. Dent. Clin. N. Am 2004 Apr;48(2):vi-vii, 445-70
